William S. Clifford, M.D.
Reed A. McAtee, O.D.

Welcome to Fry Eye Associates! We hope that you are looking forward to your appointment with us. In this packet are several helpful items to make your experience at Fry Eye a success.

FORMS: We recognize that your time is valuable. To keep your appointment as timely as possible, we must have the attached forms completed and returned *prior* to your appointment:

- Patient Registration Form
- Medical History Form
- Lifestyle & Visual Questionnaire

Failure to return completed forms within 5 days of your appointment may cause your appointment to be delayed or rescheduled. If there is not sufficient time for mail delivery, you may:

- Fax completed forms to (620) 275-5262
- Email completed forms to FryEyeMail@fryeye.com
- Hand-deliver to 502 College Street at least 5 days before your appointment.

NOTE: A family member or other representative may sign on your behalf **ONLY** if we have legal paperwork on file (i.e., Medical Power of Attorney documentation).

IMPORTANT INFORMATION FOR CONTACT LENS WEARERS: If your appointment is for a *Cataract/Blurry Vision Evaluation*, or for a *Refractive Surgery/LASIK Evaluation*, soft contact lenses must be removed a minimum of one (1) week prior to your appointment; and rigid/gas permeable contact lenses must be removed a minimum of three (3) weeks prior to your appointment.

RESIDENTS OF CARE HOME FACILITIES: All residents of care home facilities need to be accompanied by a care giver or family member. Our employees are not licensed or trained in lifting/transferring patients, nor are they trained to provide restroom assistance.

TRANSLATION SERVICES:

Dependent upon the daily schedule, a Fry Eye Associates translator may not be immediately available. If you need a translator, please bring one with you; otherwise, your patient care may be delayed until the next translator becomes available. *Dependiendo del horario diario, es posible que un traductor de Fry Eye Associates no esté disponible de inmediato. Si necesita un traductor, traiga uno; de lo contrario, la atención de su paciente puede demorarse hasta que el próximo traductor esté disponible.*

If you have any unanswered questions after reviewing this material, please don't hesitate to contact us. We are excited to have you as our guest!

Fry Eye Associates Physicians and Staff

NOTE: All appointments are for an EVALUATION ONLY.
If surgery is recommended, it will be scheduled for a later date.

IMPORTANT INFORMATION FOR CATARACT EVALUATION PATIENTS

Welcome to Fry Eye Associates! We look forward to visiting with you at your appointment. Our records indicate that you are scheduled with one of our surgeons to determine if cataract surgery would be beneficial to you. **Keep in mind, this appointment is only an evaluation; surgery will be scheduled for a later date, if indicated.** During your evaluation appointment, you will undergo comprehensive testing to help your surgeon make a determination for surgery. **This appointment is extensive and may take three hours to complete.**

Recent advancements in cataract surgery technology have opened up new options for surgical patients, and our goal is to give you the information and time needed to make the choice that best fits your lifestyle. Prior to your appointment at Fry Eye Associates, please take a moment to thoroughly review all of the enclosed information. After reading this material, if you have any questions, please do not hesitate to contact our office. Let's begin with a few definitions:

A *cataract* is a cloudy lens, or a clouding of the natural lens with which you were born. Just as a cloudy window blocks light from passing through the glass, a cloudy lens blocks light that needs to enter your eye, thus causing blurry vision. Cataract surgery is indicated when vision worsens to the point where, even with glasses or contact lenses, you notice difficulty with activities of daily living such as reading or driving.

During cataract surgery, your cloudy lens will be removed and an artificial lens implant, called an *intraocular lens (IOL)*, will be placed inside your eye. Replacing the cloudy lens with a clear implant allows the eye to regain its former potential vision. At Fry Eye Associates, we feel it's important for you to understand the lens replacement options that may be available to you. These options currently are:

Monofocal Lens: Patients who simply want to see better but do not mind wearing glasses or contact lenses are best served by having basic cataract surgery with a monofocal lens. With basic cataract surgery, we implant a traditional monofocal lens with powers typically calculated to help you see clearly at a distance. This is a popular option and uses the tried-and-true technology of traditional monofocal IOLs that has been developed with great success for over 50 years. After cataract surgery with a monofocal lens implant, most patients will require reading glasses and/or bifocals to achieve their best near vision and many will require glasses for best vision at all distances due to factors like astigmatism (see Toric Lens section below to learn about astigmatism). Understand that although an effort is made to lessen dependence on glasses even with basic surgery, *glasses will still often be needed, especially for reading.*

Basic cataract surgery is the least expensive option for our cataract patients, yet quality of vision should be excellent after surgery in normal, healthy eyes, though it's important to remember that glasses are often required to achieve this. Surgery with a monofocal implant is covered by Medicare and most commercial insurance plans, excluding standard out of pocket expenses, such as your deductible, co-pays, and/or co-insurance.

Toric Lens: In order to understand custom astigmatic surgery with a toric lens implant, it is important to have a good understanding of *astigmatism*. Astigmatism is an irregularity in the shape of the cornea (the clear window at the front of the eye). An eye without astigmatism has focusing elements that are essentially spherical, like a basketball. An eye with astigmatism has a shape more like the surface of a football or an egg; this distortion of the cornea causes images at all distances to be blurry.

If astigmatism is not corrected at the time of surgery, blurred vision from the astigmatism will remain afterward surgery unless glasses or contact lenses are used to correct the astigmatism. For those patients who desire a reduced dependency from glasses, custom astigmatic surgery with implantation of an astigmatism-correcting toric lens may be the best option to consider, especially for those with larger amounts of astigmatism. Your doctor will tell you if you would benefit from a toric lens implant.

(Continued on the reverse side)

Correction of astigmatism with a toric lens implant is considered by Medicare and private insurance carriers to be a cosmetic or luxury device. Therefore, the toric lens upgrade is not covered by insurance, and there is an out-of-pocket expense* for this option, above and beyond your deductible, co-pay and/or co-insurance:

- Physician Fee (additional testing, planning and surgical time): \$500.00 per eye
- Facility Fee (lens): \$450.00 per eye

Multifocal Lens: For patients who desire significant independence from glasses and contact lenses, we can achieve these goals using advanced multifocal technology implants such as the PanOptix lens. The multifocal lens is designed to provide high-quality vision at multiple distances such as near and far away, which may minimize the need for glasses for most activities such as driving, reading and computer work. Although the multifocal lens may be an excellent option for reducing your dependence on glasses or contact lenses, *it is impossible to guarantee that you will be able to completely eliminate your need for glasses for all activities.*

Weaknesses inherent in all multifocal lens designs include aberrations that can cause glare and halos, especially at night around oncoming headlights. You may also experience a loss of sharpness, which may become worse under poor visibility conditions such as dim light or fog. Therefore, we do not recommend this type of lens implant for all patients. Your doctor will tell you if you are a candidate for a multifocal lens implant.

Because Medicare and commercial insurance plans consider the multifocal lens to represent a luxury technology that is not absolutely necessary, there is an out-of-pocket expense* for the lens and additional testing, above your standard deductibles, co-pays, and/or co-insurance.

- Physician Fee (additional testing/evaluation and lens selection): \$1,500.00 per eye
- Facility Fee (lens): \$1,000.00 per eye

Light Adjustable Lens: Designed for patients who desire maximum independence from glasses and contact lenses, the Light Adjustable Lens can also provide highly refined quality of vision through precise adjustments of the lens after surgery. The Light Adjustable Lens contains a special material that changes its shape in response to customized UV light treatments delivered by the surgeon a few weeks after the surgery has been completed. This allows for very high precision and predictability of results, as well as tailoring of vision to suit your individual needs. An additional advantage is the relatively low risk of aberrations that may cause glare, halos and loss of sharpness. Although the Light Adjustable Lens may be an excellent option for reducing your dependence on glasses or contact lenses, *it is impossible to guarantee that you will be able to completely eliminate your need for glasses for all activities.* Your doctor will tell you if you are a candidate for the Light Adjustable Lens implant.

Because Medicare and commercial insurance plans consider the Light Adjustable Lens to represent a luxury technology that is not absolutely necessary, there is an out-of-pocket expense* for the lens and additional testing, above your standard deductibles, co-pays, and/or co-insurance.

- Physician Fee (additional testing/evaluation and adjustments): \$2,500 per eye
- Facility Fee (lens): \$1,000 per eye

Before undergoing cataract surgery, it is important to ask, “What lens replacement option best fits my vision and lifestyle needs?” Your eyes are unique – treating them should be too. No procedure or implant is perfect, and not everyone is a candidate for advanced-technology lens implants. You should discuss the potential benefits, risks, limitations, and alternatives with your surgeon to determine which option is best for you. Please ask for more information during your visit. We’re here to assist you in any way we can.

**Payment must be received at least one week prior to surgery and may be made with cash or personal check; we also accept all major credit cards and Care Credit, an independent financing company providing affordable financing options for health care needs. Our staff can provide you a brochure with details and terms.*

One of the foundational principles at Fry Eye Associates is the continual improvement of cataract surgery outcomes. Recent data indicates that we can make significant strides with refractive accuracy by improving the health of your cornea prior to your evaluation, measurements and surgery. This is particularly important for patients who are candidates for intraocular lenses that correct astigmatism and/or reduce your dependence on glasses after surgery. To assist us in this, we ask that you follow the Tear Film Stability Instructions below for approximately two weeks before your cataract evaluation. Please call us at (620) 275-7248 if you have any questions about these instructions.

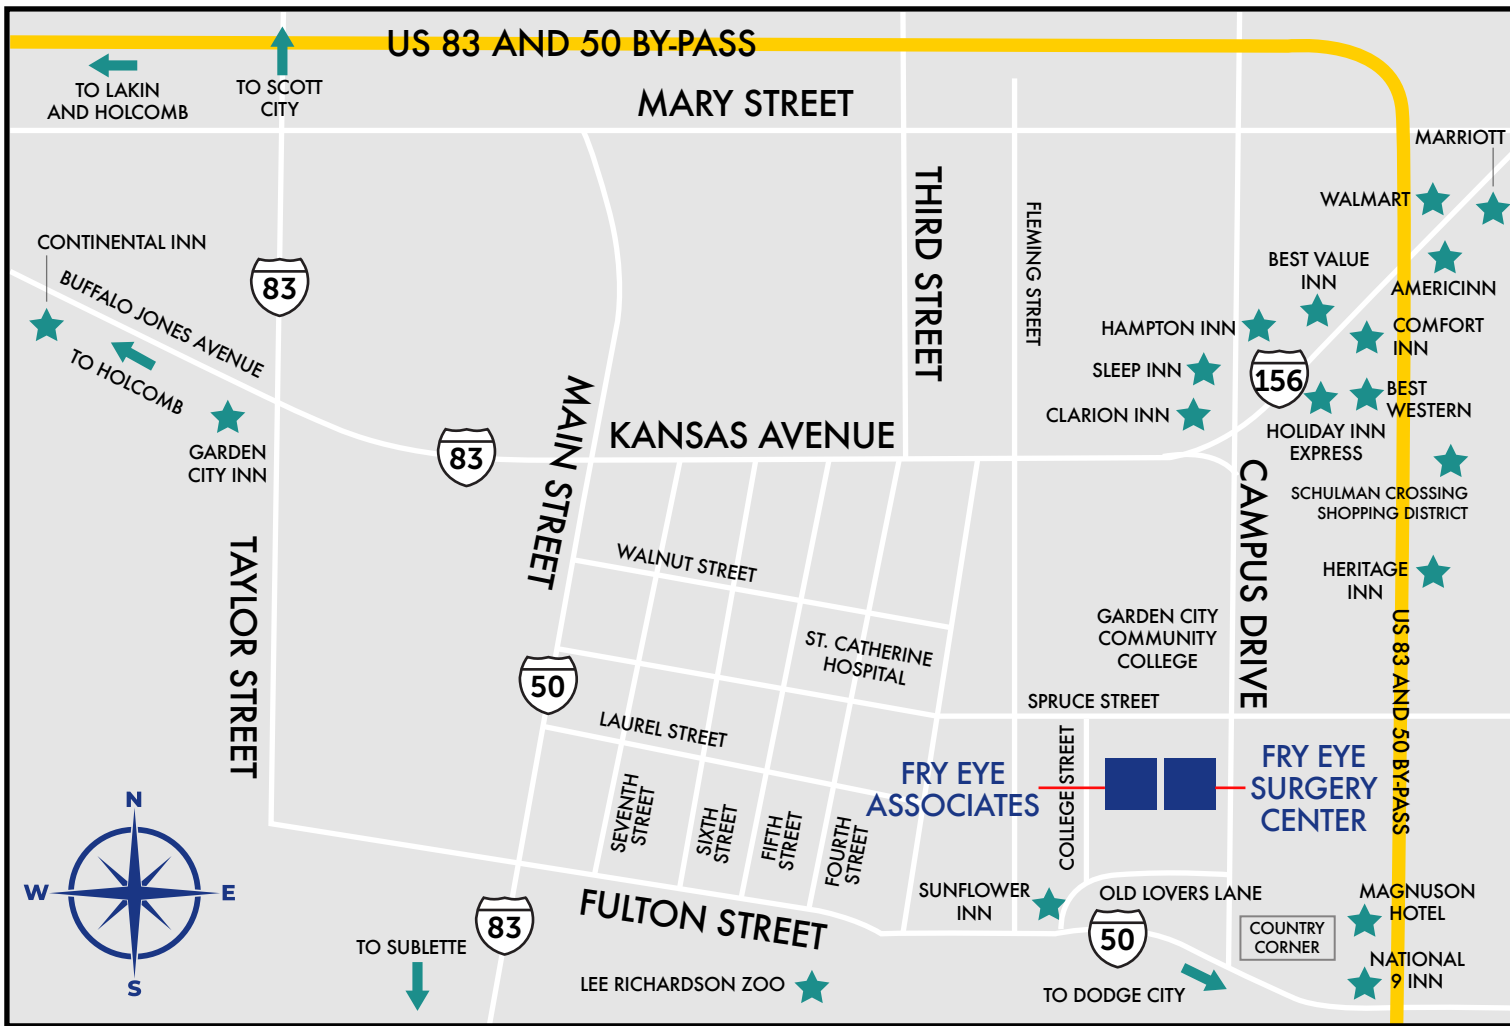

Tear Film Stability Instructions

1. Instill an artificial tear to both eyes **four** times daily – when you wake up, at lunch, dinner and bedtime. *Artificial tears lubricate dry eyes and help maintain moisture on the outer surface of your eyes.*
2. Apply a hot washcloth to your closed eyes for 3-5 minutes **two** times daily – morning and evening. *This helps melt the thick oil that might be blocking your eyelid's oil glands, called meibomian glands. Meibomian glands secrete oil that covers and protects the surface of your eye.*

Fry Eye Associates, P.A. and Fry Eye Surgery Center, L.L.C.

Dear Valued Patient:

Thank you for choosing Fry Eye Associates, P.A. and/or Fry Eye Surgery Center, L.L.C. for your eye care needs. We focus on providing the best care possible, and we want our billing services to be a good experience for you, as well. The billing process can be complex. This document provides you with our policies and procedures, which will help guide you through the billing process.

Copies of Insurance Cards and Patient Identification:

It is very important that we have a copy of your current insurance card(s) on file. This ensures that we can contact your insurance company if we have any issues with your claim. ***Please bring your insurance cards with you to your appointment, along with a government-issued photo identification (driver's license, state issued ID, etc.) for identity verification.***

Payment Process:

A claim will be sent to your insurance company for services rendered. Your insurance company may contact you for further information. Your quick response will assist your insurance company in processing your claim in a timely manner. Typically, your insurance company will pay your claim in 30-45 days. After we receive payment from your insurance company, we will provide you with a statement showing the insurance payment and any amount you may owe. If there is a problem getting your claim processed or paid through your insurance company, we may contact you for further assistance. *Please be aware that you may be asked to pay for services (up to the amount of your unmet deductible and applicable co-pay) at the time of your appointment and/or prior to scheduling a surgical procedure.*

Other Bills You May Receive:

We have **two separate businesses**: Fry Eye Associates, P.A. and Fry Eye Surgery Center, L.L.C., which may have provided care to you. If you received care at both facilities, please know that you will receive a bill from both businesses. One bill will be for the doctor/exam fees (Fry Eye Associates, PA) and one for surgical services (Fry Eye Surgery Center, LLC). If you received anesthesia at our surgery center, you will receive a separate bill from Steel Anesthesia Services, PA. If you have questions regarding any of these bills, please call the number that is listed on the statement you received.

Customer Assistance:

We are pleased to answer any questions you may have about your experience at Fry Eye Associates, P.A./Fry Eye Surgery Center, L.L.C. We can be reached at (620) 275-7248 or toll free at (800) 526-3937. Please call this number for questions regarding either Fry Eye facility and have the patient's name and date of birth available when you call.

FREQUENTLY ASKED QUESTIONS

- **Why didn't my insurance company pay this balance?**

Your insurance company may determine that a portion of the charges submitted are your - the patient's - responsibility. This can include deductibles, co-payments and items and services that are not covered by your specific insurance plan. For specific questions, please call your insurance company directly.

- **Why did I receive a bill a month ago, stating that I had a zero dollar balance, but now I am receiving another bill requesting payment?**

You may receive a statement from us for your first date of service, even if the insurance company has not yet paid a claim for a second date of service. If a claim for a specific date of service is pending insurance decision, the patient's account will not show a balance for that date of service until insurance has paid. After insurance has paid, you will receive a statement for any remaining balance deemed patient responsibility. Insurance companies typically send an "Explanation of Benefits" (EOB) form to their beneficiaries (the patient) explaining their payment. When in doubt, please refer to the EOB for each date of service in question.

- **Why am I receiving two separate bills for two separate amounts?**

We have two separate businesses: Fry Eye Associates, P.A. and Fry Eye Surgery Center, L.L.C. Please examine your statement to see which facility your bill is from – always call if you have any questions.

- **I have an HMO. What should I do prior to my appointment to ensure payment for my exam?**

If you have an HMO, you will need to contact your insurance company to verify in-network vs. out-of-network coverage for any exams or procedures at Fry Eye Associates and/or Fry Eye Surgery Center. Failure to do so could cause you to be fully responsible for payment for all services rendered.

- **What should I do if my insurance company requires a letter of referral?**

If your insurance company requires you to have a letter of referral to Fry Eye Associates and/or Fry Eye Surgery Center, you must make this letter available to our office *PRIOR* to your appointment. Failure to submit this referral letter prior to your appointment could result in postponement of your appointment.

- **Why am I receiving a bill from Steel Anesthesia Services, P.A.?**

The anesthetist who provided your anesthesia care at the surgery center is his/her own independent provider. Please call the Anesthesia Billing Company at (800) 835-2231 for questions related to your bill from Steel Anesthesia Services, P.A.

**Thank you for choosing Fry Eye Associates, P.A. and
Fry Eye Surgery Center, L.L.C. as your health care providers!**

Notice of Nondiscrimination

Fry Eye Associates, PA and Fry Eye Surgery Center, LLC (collectively referred to as "Fry Eye" for the purposes of this policy) comply with applicable Federal civil rights laws and do not discriminate on the basis of race, color, national origin, age, disability, or sex. Fry Eye does not exclude people or treat them differently because of race, color, national origin, age, disability, or sex. Additionally, Fry Eye:

- Provides free aids and services to people with disabilities to communicate effectively with us, such as:
 - Qualified sign language interpreters
 - Written information in other formats (large print, audio, accessible electronic formats, other formats)
- Provides free language services to people whose primary language is not English, such as:
 - Qualified interpreters
 - Information written in other languages

If a patient is in need of these services, contact Jennifer Deimund at 1-620-276-7699 or 1- 620-275-7248.

If a patient believes that Fry Eye has failed to provide these services or discriminated in another way on the basis of race, color, national origin, age, disability, or sex, the patient can file a grievance with the Civil Rights Coordinator:

Jennifer Deimund
502 College Street
Garden City, KS 67846
620-275-7248 - phone
620-275-5262 - fax
fryeyemail@fryeye.com

A grievance can be filed in person or by mail, fax, or email. The Civil Rights Coordinator is available to help a patient file a grievance. A civil rights complaint can also be filed with the U.S. Department of Health and Human Services, Office for Civil Rights electronically through the Office for Civil Rights Complaint Portal, available at <https://ocrportal.hhs.gov/ocr/portal/lobby.jsf>, or by mail or phone at:

U.S. Department of Health and Human Services

Lifestyle and Vision Questionnaire: Please help us evaluate which intraocular lens option(s) might most meet your needs by answering the following questions:

1. Would you prefer to be less dependent on glasses?

Yes

No

If the answer above was “Yes,” would you prefer to be less dependent on glasses at distance only, or distance and near?

Distance only

Distance and near

2. Which is most important to you: mid-range or near vision?

Mid-range

Near

Both are equally important

3. Have you enjoyed wearing monovision contact lenses in the past?

I tried and couldn't tolerate monovision contact lenses.

I have never tried monovision contact lenses.

I tried monovision contact lenses and did fairly well.

I loved wearing monovision contact lenses.

4. Have you ever had refractive surgery?

No

LASIK or PRK: hyperopic/farsightedness myopic/nearsightedness

RK

RK and LASIK/PRK

Yes – unknown type

5. Would you be willing to pay out of pocket to reduce your need for glasses? (Approximately \$950 per eye for a toric lens implant or \$2,500-3,500 per eye for a premium/multi-focal lens implant.)

Yes

No
